University Street,
Al Jerf 1 – Ajman
P.O. Box 346 Ajman,
United Arab
Emirates.

Dear Sir/Madam,

13th December 2025

To Whom It May Concern,

I am pleased to recommend Mr. Ahmed Mohammed Khaer Alzoubi for employment in the fields of computer engineering, embedded systems, IoT, robotics, or digital systems. I have taught Ahmed in several Computer Engineering courses at Ajman University, and he has consistently demonstrated strong technical skills, hands-on ability, and a high level of professionalism.

Ahmed is a motivated and engaged student with a good balance between academic knowledge and practical skills. His experience as Computer Engineering Club Leader reflects his leadership, teamwork, and communication abilities, as he successfully organized workshops, competitions, and technical sessions for students across the college.

Technically, Ahmed has strong capabilities in embedded systems, microcontrollers (PIC, Arduino, ESP32), VHDL, IoT, FPGA design, and robotics. I also supervised his graduation project, a Smart Helmet with real-time HUD navigation, where he successfully integrated an ESP32-based system with BLE communication and an Android application. The project demonstrated his ability to combine hardware and software while addressing real-world engineering constraints. In addition, he has completed several hands-on projects, including motion-detection security systems, robotic arm simulations, weather stations, temperature-controlled systems, and FPGA-based digital lock designs. These works highlight his strong problem-solving skills and practical engineering mindset.

Based on his technical expertise, practical experience, and strong work ethic, I am confident that Ahmed will be a valuable addition to any organization.

If further information is needed, please feel free to contact me.

Thank you.

Sincerely,

Associate Professor Dr. Mohamad Khairi Ishak
Deparment of Electrical and Computer Engineering,
College of Engineering and IT,
Ajman University, Ajman, UAE.
